### Project Overview

#### A. Project Description

Jefferson Hall, built in 1957, is a 140,000 SF building located on Ohio University's East Green. It is a four story structure, with a basement garage space. The first floor includes the main building entrance, a currently unused dining hall, a small retail food market, and a variety of spaces which provide support to the residence hall portion of the building. The upper three floors contain about 140 dormitory rooms, plus support spaces.

This project will renovate the entire building. The former dining hall space (about 16,000 SF) will be renovated as a retail food market/café operation. The remainder of the first floor will be renovated as academic support spaces for the residence hall, as the focus of a living learning community. The upper floors will be renovated as undergraduate residential rooms, plus various support spaces. The basement garage area will require some general upgrades to address building infrastructure and code compliance.

The building is located on a confined site, with limited vehicle access; adjacent residence halls will be occupied during this renovation. The renovation of the food service areas and the residence hall areas will be done consecutively, not concurrently.

The selected Architect/Engineer (A/E), as a portion of its required Scope of Services and prior to submitting its proposals, will discuss and clarify with the Owner and/or the Contracting Authority, the cost breakdown of the Architect/Engineer Agreement detailed cost components to address the Owner's project requirements. As required by the Agreement, and as properly authorized, provide the following categories of services: Program Verification, Schematic Design, Design Development, Construction Document Preparation, Bid and Award Support, Conformed Documents, Construction Administration, Post-Construction, and Additional Services of all types.

Refer to the *OFC Manual* for additional information about the type and extent of services required for each. A copy of the standard Agreement can be obtained at the OFCC website at <http://ofcc.ohio.gov>.

During the construction period, provide not less than 24 hours (excluding travel time) on-site construction administration services each week, including (1) attendance at progress meetings, (2) a written field report of each site visit, (3) on-site representation comprised of the A/E and its consultant staff involved in the primary design of the project, all having relevant and appropriate types of construction administration experience.
