Project Overview

A. Project Description

Bowling Green State University (BGSU) will be replacing its Greek housing on its Bowling Green campus. Following an extensive two-phase study and considerable planning work with student representatives of all Greek chapters, chapter advisors, alumni, Greek national organizations, university administrators, and other stakeholders, recommendations for replacing the housing were approved by the University Board of Trustees in December 2012.

The approved plan recommends replacement housing for more than 30 Greek chapters. The total number of beds to be developed is approximately 412. All chapters will be housed in town home style housing with unit sizes based on chapter size and projected membership. Three sizes of town homes are currently included in the program; they range from 4 to 18 beds. Seven chapters are to be housed in 4 bed town homes. Eleven chapters are to be housed in 12 bed town homes. Fourteen chapters are to be housed in 18 bed town homes.

In addition to the recommended town home sizes, the approved plan includes a project cost estimate of \$30 million and site plan (attached).

This project will utilize the Design-Build project delivery method and will be managed and financed directly by the University. This will not be undertaken as a public/private partnership.

The anticipated project delivery method for this project is Design-Build.

State Prevailing Wage requirements apply to this project.
