

RFQ Question and Answer List

State of Ohio Standard Forms and Documents

Project Name Harrison Hills City SD Project Number SFC-160396

Date posted: 12/18/2015

Date revised: [If needed]

Below are the questions that have been received to date for the RFQ of the above-referenced project:

1. Is the consultant that was chosen a geotechnical engineering firm? If so, will they continue as the District's consultant for the geotechnical services provided relative to the enhanced site work and enhanced foundations? If not, what selection process will be followed by the District or your selected A/E to acquire these services, as well as environmental analysis services as the existing facilities are demolished, and for materials testing services as the new facility is being constructed?
 - A. The consultant used by the district performed some early preliminary testing which helped the district determine how much to supplement the budget due to deleterious material. The AE selected for this project will be responsible for selecting their own geotechnical consultant and perform as a sub-consultant to the AE. The AE is responsible for hiring their own sub-consultant to perform environmental analysis services for the abatement/demo projects. The AE is also responsible for hiring their own construction testing firm to fulfill all of the testing requirements during the new construction.
