### Project Overview

#### A. Project Description

Ohio Stadium (<http://www.ohiostatebuckeyes.com/facilities/ohio-stadium.html>) is the home field of The Ohio State University Buckeyes football team and is located on Woody Hayes Drive, south of Woodruff Avenue. Opened in 1922 various University departments also have office space and assorted support spaces within the facility. Non-athletics events such as music concerts and graduation ceremonies are also held in the space throughout the year. The Stadium was listed on the National Register of Historic Places in 1974. In 2001, the facility underwent a major renovation at which time the horseshoe was enclosed.

This project will include the following scope items:

- Restore and re-coat the 94-year old concrete on C-deck concourse and seat deck. Repairs include, but are not limited to, new traffic coating, expansion joints, backer rod and sealant replacement, typical concrete repairs in the vomitories and seat deck slabs, guardrail repair and anchoring/sealing, and applying epoxy leveling coating onto all tread surfaces. In addition, the four tower roof systems will be restored.
- For the east, west and south stands; upgrade power distribution systems and provide redundancy.
- Renovate the premium seating area to consolidate the university suites into one University Suite, add 35 Loge Boxes, 12 Luxury Suites, and renovate the associated kitchen and support areas.

All work will be done in coordination with the facilities events scheduled in the facility throughout the year and needs of the various office tenants. The project will be consistent with the One Ohio State Framework Plan (<http://oneframework.osu.edu/>), the Design Guidelines for Buildings and Landscape (<https://fod.osu.edu/sites/default/files/buildings-landscape.pdf>) and the Athletics District Framework Plan Update ([http://fod.osu.edu/masterplans/subdistrict/2013\\_mar\\_athletics.pdf](http://fod.osu.edu/masterplans/subdistrict/2013_mar_athletics.pdf)). The study excerpts as provided will serve as the initial Program of Requirements. A Construction Manager at Risk will be selected and contracted directly with the University. The selected AE shall evaluate this project for USGBC LEED certification and make a recommendation to the University.

This project is required to be designed and delivered within a collaborative BIM-enabled environment following The Ohio State University BIM Project Delivery Standards. The Primary firm submitting for the project will be required to have the BIM expertise capable of meeting the aforementioned standards. The Ohio State University BIM Project Delivery Standards can be accessed via the OSU FOD website: [ohio-state\\_bim\\_pds.pdf](http://ohio-state_bim_pds.pdf). Unless noted otherwise, the minimum required BIM Use Cases are outlined in Section 2.
