Project Overview

A. Project Description

The East Campus Utility Plant (ECUP) is a building that houses boilers providing steam for the East/Medical campus of the University of Cincinnati. This project will install a new boiler no. 4 in the location where an old coal-fired boiler was removed. This project is located in Room B08 of the East Campus Power Plant on the Uptown Campus – East. Installing this boiler will restore capacity lost when coal boiler no. 4 was decommissioned several years back and will replace capacity lost when boiler no. 2 is removed from service in the near future. It is critical that the new boiler be installed and operational by the winter of 2017/2018.

The Program of Requirements (POR) will be developed as a part of this project by the University of Cincinnati.

All aspects of the project and related issues will be implemented and operated consistent with the University's policies and procedures.
