

RFQ Question and Answer List

State of Ohio Standard Forms and Documents

Project Name Chilled Water Plant #3 Project Number OHU-170011
Project Location Ohio University

Date posted: January 23, 2017

Date revised:

Below are the questions that have been received to date for the RFQ of the above-referenced project:

1. Assume OU wants the primary consultant to also name the firm/individual that will be responsible for the structural engineering portion of Chiller Plant #3 (OHU-170011).
 - A. Yes
2. Can you clarify the last sentence of the first paragraph under project description? It states: "The Building shell will be designed and built at SD level with considerations to accommodate the ultimate build-out..." Are we to interpret this to indicate that the building shell will be a preliminary package issued for construction after SD?
 - A. No. To clarify, the building shell will be designed and built with considerations to accommodate the current equipment needs and the ultimate build-out of all chiller bays as well as two future boilers and two future heat recovery chillers. All future build out requirements apart from the building shell not associated with the current build out requirements will be taken to Schematic Design only.
3. Also, are you at liberty to disclose the specific proposed location for the plant building?
 - A. No additional information is available at this time.
