

RFQ Question and Answer List

State of Ohio Standard Forms and Documents

Project Name Veto Lake Dam Interim Risk Reduction Measures Project Number DNR-180032
Project Location Veto Lake Wildlife Area

Date posted: 5/31/2018

Below are the questions that have been received to date for the RFQ of the above-referenced project:

1. Will ODNR provide access to the previously completed Preliminary Assessment Report? Given that firms that had completed preliminary assessment reports have been allowed to pursue final design, providing the information would allow other firms a more equal opportunity to understand the current assessment of the dam.
 - A. Selected previous reports and investigations for this project will be provided to shortlisted firms by ODNR. For the purposes of providing a statement of qualifications, the detailed information provided in these documents is not necessary. Please refer to the project description for information regarding the scope of this project.
2. Please confirm that the scoring on Item 1.c “Number of licensed professionals” is correct. Currently it is weighted towards firms that only have between 5-10 professionals, which seems to indicate ODNR prefers firm with limited capacity; however, this would not be in the best interests of ODNR for this project given its complexity and specialization of the dam safety work.
 - A. Scoring is correct and represents the desired number of licensed professional in the Lead Firm that will provide the primary services required for the project.
3. RFQ Section E. has been updated with a description of Basic Services specifically for Engineering related projects:

NOTE: **Basic Services** include: (1) Study and Report Verification, (2) Preliminary Design, (3) 50% Design, (4) 90% Design (5) 100% Design, (6) Bidding and Award OR GMP Proposal and Amendment (as applicable), (7) Construction Administration, and (8) Closeout services. The **Basic Fee** includes all professional design services and consultant services necessary for proper completion of the Basic Services, including validation of existing conditions (but not subsurface or hidden conditions) and preparation of cost estimates and design schedules for the project. **The Basic Fee excludes any Additional Services required for the project.**
