

Ohio School
Facilities
Commission

F Y 2 0 0 9 A n n u a l R e p o r t

Since 2002, the Ohio School Facilities Commission has published its annual report reflecting activity in each calendar year. The state of Ohio, however, conducts its financial activity on a fiscal year system starting July 1st of each year and ending June 30th in the following calendar year. With this annual report, the Commission is converting from a calendar year to a fiscal year reporting period.

The Commissioners

The Ohio School Facilities Commission (OSFC) was created in May 1997 as a separate and distinct state agency to oversee the rebuilding of Ohio's public schools. The Commission, by law, consists of three voting members and four non-voting legislative members. During Fiscal Year 2009, the three voting members were:

- **J. Pari Sabety**, Director of the Office of Budget and Management

*Director Pari Sabety,
Chair*

*Director Hugh Quill,
Vice Chair*

Dr. Steven Puckett

- **Hugh Quill**, Director of the Department of Administrative Services, and
- **Deborah Delisle** and **Susan Tave Zelman** (served to October 31, 2008), State Superintendents of Public Instruction (who delegated the position to Assistant Superintendent Dr. Steven Puckett).

Of the four non-voting members from the General Assembly, two must be appointed by the President of the Senate and two must be appointed by the Speaker of the House of Representatives; each from two different political

parties. Non-voting members serve for the biennial legislative session in which they are appointed. Because legislative sessions operate on the calendar year, Fiscal Year 2009 spanned two different legislative sessions.

Term inclusive of 2007 & 2008

Sen. Larry Mumper

Sen. Tom Roberts

Rep. Clyde Evans

Rep. Matt Szollosi

Term inclusive of 2009 & 2010

Sen. Gary Cates

Sen. Teresa Fedor

Rep. Clyde Evans

Rep. Matt Patten

Executive Director's Message

A little more than two years ago, we were charged with developing a clear vision statement for this agency. Collectively we agreed to and began to implement our “Look Forward, Look Back and Look in the Mirror” philosophy.

As we “Looked Forward” we were challenged with preparing districts on an accelerated schedule, to effectively and wisely use the \$4.2 billion from the Tobacco Securitization Settlement. In addition, we adopted the LEED® for Schools rating system and began to develop a Green Schools program that is second to none in the nation. We did this with minimal staffing changes and a fantastic cooperative effort with the school districts we serve.

In “Looking Back” we honestly recognized the less than satisfactory results in some of our completed projects. The choices were simple: walk away and say it’s not our problem or stand as a true partner with the school district to rectify the situation.

With the implementation of our Corrective Action Grant Program, we have begun to discover appropriate remedies, fix the work, and then negotiate responsibility. Our emphasis has been to simply let the school district know, “We are going to be your partner and give you the high-quality product for which you paid.”

“Looking in the Mirror” has been a little more challenging, as we critiqued our very successful delivery method and searched for ways to make it better. Changing our guidelines to allow H.B. 264 funds for new construction, providing asbestos abatement without demolition, increasing budgets for floor and roof choices, and many other ideas come to mind.

Many of our successes are particular points of pride for me personally:

- In 18 months the young people at the Ohio School for the Deaf and the Ohio School for the Blind will be moving into great dormitories and classroom space environments.

- The kids in Vinton County no longer eat lunch at the pool hall, but relax in a new cafetorium designed just for them.
- The students in Monroe County can get rid of their “trailer trash” tee-shirts and begin designing signs for their six new buildings and modernized River High School.
- The youngsters in Brown County no longer have reading classes in a converted coal bin or locker room.
- You can flush if you’re from Flushing School District because the old building is no longer used for students. They now have modern technology, security systems—and toilets—in their new building.

However, the accomplishment that gives me the most pride is the cooperative spirit each OSFC employee takes to the job site every day. School officials, construction management personnel, design team members, and district residents make a point to relay their appreciation for the great attitude and professional courtesy we extend to them as they struggle with the difficult decisions that come along with their school renovation or building project.

Respectfully,

Michael Shoemaker

Michael C. Shoemaker
Executive Director

Highlights

Legislative Changes

In Fiscal Year 2009, the Ohio General Assembly finished work on several pieces of legislation that changed OSFC programs. The most notable changes were corrective action grants, segmenting, and solar ready schools.

Corrective Action Grants

In December 2008, the General Assembly passed House Bill 266, which authorized OSFC to create the Corrective Action Grants Program. These grants are to be used to fix work found to be defective or omitted from a school funded through OSFC programs. A school district must notify OSFC of the problem within five years of the close-out of the project. The Commission must then evaluate the defective or omitted work and determine the best way to remediate it.

Segmenting

At its September 2008 meeting, the Commission approved a policy for segmenting projects, putting into place a change in statute that was included in the Capital Bill (House Bill 562) as signed by Governor Strickland on June 24, 2008.

Under previous law, only the "Big 6" urban districts were allowed to segment their Classroom Facilities Assistance Program (CFAP) projects. For all other districts, the only option was to accept a master plan for a "full fix" for all the facility needs of the district, and raise the local share of that entire project.

The new law allows a district offered funding under CFAP to undertake a school construction project in phases or "segments." The segment must be big enough that the local share is equal to at least four percent of the district's valuation and must contain all the work to be done on any building included in the segment. For example, a district cannot choose to do a partial renovation in the first segment and finish the renovation later. If a district chooses to undertake a project in segments, the later segment will be treated as a supplement to the initial project agreement and will require approval of additional state funds. The local share percentage of any subsequent segment would be the same as that of the first segment. The segmenting language does not change the order of funding offers by the OSFC (we will continue to offer funding in the

order of the equity list), nor does it change the application of the Ohio School Design Manual to the project.

Solar Ready Schools

Provisions in the Energy Bill (Senate Bill 221)—which became effective July 31, 2008—directed the OSFC to adopt "solar ready" requirements so rooftops on state-funded school buildings can accommodate solar panels. In November 2008, the Commission amended the 2008 Ohio School Design Manual to include new guidelines for roof space and shading requirements, structural requirements, electrical system access, and building mapping and orientation.

Qualified School Construction Bonds (QSCB)

In addition to state legislative changes, the President signed the American Recovery and Reinvestment Act of 2009 (ARRA) into law on February 17, 2009. Frequently referred to as the federal stimulus bill, ARRA provided federal funding to boost a host of education-related programs. The final bill did not include a general program targeting school modernization, renovation, and construction. However, ARRA did augment and create a number of bond programs that can be used for school construction programs (which included the QSCB program).

In May 2009, OSFC published guidelines for schools interested in QSCB funding. The bonds provide federal tax credits for bond holders in lieu of interest in order to significantly reduce an issuer's cost of borrowing for public school construction projects. The ARRA provides for an allocation to each state, along with separate allocations for large school districts. Guidance provided by the Internal Revenue Service indicates that the allocation for Ohio is \$267,112,000 in calendar year 2009 and is anticipated to approximate the same amount in calendar year 2010. Additional allocations totaling \$151,671,000 in CY 2009 were made directly to Ohio's five largest urban districts, which may choose to reallocate any unused balance to the State of Ohio. The State's role is to provide bond issuance authorizations for public school projects, based on the assurance they meet federal criteria for the programs. Projects financed by QSCB will be subject to the federal prevailing wage law known as the Davis-Bacon Act.

Highlights

Green Schools Initiative

As of June 30, 2009, there are 145 OFSC projects registered for LEED Certification with the US Green Building Council. Schools in districts that were approved for funding after September 2007 are being built to meet at least LEED Silver Certification, with a goal of meeting the LEED Gold level. Leed Certification point levels are Certified (29-36), Silver (37-43), Gold (44-57), and Platinum (58-79). Current registered projects average a total of 44 points.

Also as part of our Green Schools Initiative, OSFC is requiring buildings to be designed to perform 35% above the energy efficiency standards set by American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE).

The OSFC has embraced both enhanced and envelope commissioning. These processes bring technical support for the building owner (school district) to ensure that all installed systems are designed to meet the owner's program

requirements, functioning properly, and integrated together for maximum operational efficiency.

The minimum information that is presented during the submission of each phase of the building design has changed so that we can ensure that our projects are meeting our goals. Changes to the process include: design team involvement at the earliest part of the process, the use of energy modeling as soon as the size of the building can be determined, the incorporation of "daylighting" standards, and enhanced oversight required for every project.

OSFC has provided outside mentoring expertise as projects move through the process. Daylighting design elements have been incorporated into the Ohio School Design Manual to assist project teams. Workshops on daylighting and other resource saving design techniques are offered on a regular basis. OSFC continues to collaborate with non-profit organizations to provide technical training on energy, daylighting and solar design.

Pleasant Ridge Montessori School (Cincinnati City School District)

Pleasant Ridge Montessori School will be Ohio's first LEED-certified public elementary school. Construction has been completed and the finished project is currently being review for LEED performance benchmarks or "credits". To reach that goal, the team focused on reducing pollution derived from construction activity, favoring low-emitting and fuel-efficient vehicles in parking plans, and providing a high ratio of open space in relation to the development footprint to promote biodiversity.

The 75,310-square-foot building takes full advantage of natural light and incorporates many green and sustainable features such as a white reflective roof, high-efficiency heating and air conditioning system, low-flow toilets and water fixtures, convex blinds between the glass that directs light toward the ceiling, sloped ceilings and transom-styled windows in each classroom to channel natural light into corridors and common spaces, and a raised flooring system for improved ventilation.

Specifically designed to fit the Montessori learning method, groups of classrooms surround common, extended learning areas, giving teachers space for extended group learning activities on each of the building's three floors. As a community learning center, the building also features centrally-located meeting rooms. Lessons on sustainable design will be explained in signage around these green buildings and, where possible, taught as part of classroom curriculum.

Highlights

Performance Evaluations

An integral part of the OSFC construction management process is taking steps to ensure high-quality work on all renovations and new construction. As part of the program delivery process, the Commission asks both the local school districts it partners with and the companies who perform the actual work to submit evaluations on all participants (contractors, architects, and construction managers) in the project. The evaluations provide useful information for school districts in the awarding of future construction contracts, not only for OSFC-funded projects, but for any school construction.

More than 7,400 evaluations of performance for contractors, architects, and construction managers are currently available through the OSFC website.

During the first half of 2009, the Commission moved forward with a plan to strengthen the evaluation process and to provide “real-time” feedback to firms working on OSFC-funded projects. A new web-based system allows participants to provide evaluations of work performed during the course of the project and allows Commission staff to provide early intervention and assistance to firms with

performance issues before the situation escalates. The results of the web-based evaluation tool will be available to the public before the end of the calendar year.

The Ohio State School for the Blind – Ohio School for the Deaf

Several hundred students, staff, parents, and alumni crowded the grounds of both the Ohio School for the Deaf and the Ohio State School for the Blind on May 26, 2009, at groundbreaking ceremonies for new academic and residential facilities. The ceremonies, featuring Governor Ted Strickland, marked the culmination two years of planning and preparation for the project.

OSFC has been appropriated \$44 million for construction and renovation on the project, where plans currently call for a combined academic area of over 127,000 square feet of space. There will also be 14 residence areas with 40,000 square feet of space in cottage style facilities to accommodate resident students Sunday through Thursday nights. The residential units will also be used for weekend sporting events and summer camps. Another “first” resulting from the project will be the construction of a connector bridge that directly links the two campuses.

The project is expected to be completed by February 2011.

Highlights

Dream School 2009 Podcast Contest

Each year in conjunction with the Council of Educational Facility Planners International (CEFPI) School Building Week, the Ohio School Facilities Commission has sponsored a Dream School competition. This year's contest was OSFC's fifth student competition.

Each of the prior year competitions has focused on different topics and different segments of students and schools in Ohio. This year, students in grades K-12 attending schools that have been offered OSFC funding beginning July 2007 and have had their building projects approved by the Commission, and obtained their local share, were eligible to participate.

This year's contest invited students to submit audio or video podcasts that focus on the importance of well-planned, high-performance, healthy, safe, and sustainable schools that foster student achievement.

Students were asked to create a two minute podcast and respond to the question, "What Do You Think?" Students selected one of five topics for their podcast:

1. What attributes would you like to see in a new "green" school?
2. How could the community use your school district facilities?
3. What would be the most important room in your new school to you...why?
4. What benefits do you think a student receives by attending classes in a new or renovated "green" school?
5. How do you think you'll feel the first time you walk into your new "green" school?

Joining OSFC as partners in their competition were the Council of Educational Facility Planners Intl., Ohio Chapter; Ohio School Boards Association; American Institute of Architects, Ohio Chapter; eTech Ohio; College Advantage; Columbus Green Building Forum; and the Construction Managers Association of America, Ohio Chapter. All of these partners generously donated prizes, expertise, or time to make the contest an exceptional one. The winning podcasts were placed on the internet through eTech Ohio's "Ohio on iTunes U" project.

First Row from L: Gretchen Lee (Pettisville), Jake Loar (Beech Grove), Cole Freidly (Beech Grove), Marcus Koons (Beech Grove); Second Row from L: Jasmine Carpenter (Maple Heights), Clara Beck (Pettisville), Shelby Miller (Pettisville)

The following students were recognized and received awards at the Commission's May 21, 2009 meeting:

First Place

Marcus Koons	Division 1, K-2	Beech Grove ES	Tuslaw Local
Gretchen Lee	Division 2, Grades 3-5	Pettisville ES	Pettisville Local
Shelby Miller	Division 3, Grades 6-8	Pettisville HS	Pettisville Local
Lincoln Frey	Division 4, Grades 9-12	Pettisville HS	Pettisville Local

Second Place

Jake Loar	Division 1, K-2	Beech Grove ES	Tuslaw Local
Clara Beck	Division 3, Grades 6-8	Pettisville HS	Pettisville Local
Mitch Hukill	Division 4, Grades 9-12	Indian Creek HS	Indian Creek Local

Third Place

Cole Freidly	Division 1, K-2	Beech Grove ES	Tuslaw Local
Jasmine Carpenter	Division 3, Grades 6-8	Mikovich MS	Maple Heights
Zach Waidelich	Division 4, Grades 9-12	Pettisville HS	Pettisville Local

Highlights

BASA School Facilities Advisory Committee

The School Facilities Advisory Committee of the Buckeye Association of School Administrators (BASA) is an independent committee of school superintendents whose purpose is to provide input and advice to the Commission regarding OSFC programs.

The Advisory Committee is drawn from superintendents residing in all ten BASA regions along with representatives of the BASA Executive Board and Legislative Committee. It meets four times yearly with Commission staff where members provide feedback on the various aspects of OSFC programs and suggestions on where improvements can be made. The committee provides in-

valuable feedback from the folks who are out in the field, doing the work.

The committee explored a wide variety of items during quarterly meetings, including OSFC initiatives such as LEED for Schools, topics surrounding the Ohio School Design Manual, and projected OSFC funding. Many of the Strickland administration's Educational initiatives such as all-day kindergarten and lower student-teacher ratios for elementary students and their potential impact on school design were also on the agenda.

The chair of the committee for the 2008 – 09 fiscal year was Superintendent Kevin Miller of Hicksville Exempted Village School District (Defiance County).

Lori Coy is the 2008 recipient of the Anthony Tripodi Award of Excellence.

The award, named for former Ohio School Facilities Commission (OSFC) Chief Fiscal Officer Anthony Tripodi, is presented to the OSFC staff member who best exemplifies Tripodi's dedication to public service and his commitment to Ohio's school children.

"Each year, the Tripodi award winner is nominated and selected by the OSFC staff," said OSFC Executive Director Michael C. Shoemaker. "Lori's selection for the Tripodi award is in recognition of her professionalism on the job and her concern for the future of school children throughout the state. The award takes on special significance because it comes from her peers—the people who work with her on a daily basis and know how important her contribution is."

Lori has served in the Finance Department as the Human Resource/Finance Manager as well as Office Manager since 1997. In her position, Coy oversees all office functions for the main Columbus office and the satellite office located in Macedonia. She has responsibility for preparing requests for the release of state funds for school district construction and renovation projects and related services. She also performs various fiscal duties related to accounts payable and receivable.

Lori has a total of 27 years of state service.

Staff Operations and Functions

Planning

Often the first contact that a school district has with OSFC is with a member of the Planning Division. These staff members develop the foundation of the school construction and renovation process: the Master Facilities Plan. Using their considerable expertise and the technical resources of various outside firms, planners work in conjunction with school administrators to develop a Master Facilities Plan that is unique for each school district. The Master Facilities Plan serves as the basis on which the budget is established for OSFC-funded projects.

Projects

The Projects Division directs construction projects by coordinating and administering projects during the design and construction phases. Project Administrators and Assistant Project Administrators are responsible for managing the budget, schedule and project quality. They monitor design conformance with the Ohio School Design Manual, review progress of construction, trouble-shoot and expedite projects as they progress through various stages. The Projects staff also facilitates conflict management, dispute resolution and problem solving during design, construction and post-construction phases.

Finance

The Finance Division provides budget, accounting and procurement services for the agency. It also provides financial planning services, including forecasting. The division works closely with school district treasurers to ensure timely payments for ongoing projects. Staff in the Finance Division monitor project expenditures, oversee project audits and work on fiscal reconciliation once a project is complete.

Information Technology

The Information Technology (IT) Division provides comprehensive support for the effective use of information technology throughout the agency. IT provides desktop support services, including both hardware and software installation and maintenance, and LAN (local area network) management. This group develops and improves upon

Staff

Web-based tools that help manage the school facilities projects. The Construction Manager Internet site serves those involved in OSFC-funded projects through the electronic storage of design and construction records, Web-based training and the management of project financial information.

Support Services

Support Services has overall responsibility for the communications and legislative affairs of the agency. In addition, this section leads the OSFC outreach effort for the state's Encouraging Diversity, Growth and Equity initiative (EDGE). This group responds to public inquiries, maintains the public website (osfc.ohio.gov), provides information to community groups, the General Assembly, the Governor's Office and the media.

Director's Office

The Executive Director's Office is supported by the Executive Assistant, the Chief Legal Counsel, and the agency's Human Resource Administrator.

Staff Activities and Service

Community Care Day

On September 16, 2008, more than 15 members of the OSFC staff gathered at South Side Learning and Development Center to participate in Community Care Day. This program is a partnership between United Way of Central Ohio and community agencies, where participants help local community service agencies and make a difference in their community. While at the South Side Learning and Development Center, OSFC staff helped by removing a retaining wall from in front of the building, replacing sod, adding flowers, and painting doors, frames, arches, and soffits in the entryways.

Combined Charitable Campaign

OSFC joined with other state agencies in the State of Ohio's Combined Charitable Campaign (CCC) from August through October 2008. During the campaign, state employees have an opportunity to contribute to nearly 2,000 charitable organizations. OSFC staff contributed through monetary contributions and fundraising events, including Casual Fridays, Tuesday donut day, a chili cook-

off, an ice cream social, and a Halloween bake sale and costume contest. OSFC far exceeded its goal of \$10,248 by giving \$14,365 through payroll deductions, one-time contributions and fundraising events.

Operation Feed

Employees at OSFC generously supported the State of Ohio 2009 Operation Feed campaign. Operation Feed is an annual spring community-wide food drive that benefits the Mid-Ohio Foodbank. For more than 20 years, Operation Feed has helped feed our hungry neighbors in central Ohio. With a staff of only 70 employees, OSFC exceeded the goal of 680 "meals" and donated 4,222 pounds of food and over \$2,000 in cash. This translates to an average employee donation of 132 meals and a total donation exceeding 9,000 meals.

Hat and Mitten Tree

During the 2008 winter holiday season, members of the OSFC staff created a hat and mitten tree in the lobby of our Columbus office. OSFC staff brought in new hats, mittens, and scarves to donate to schools in the area. Staff members decorated the tree with a total of 53 hats, 85 pairs of mittens and gloves, seven scarves, and two pairs of ear muffs. These much needed items were distributed to two Columbus elementary schools.

Homeless Families Foundation Book Drive

In the spring of 2009, OSFC sponsored a book drive and collected nearly 50 new children's books for the Homeless Families Foundation—a Columbus family shelter that provides support services, tutoring, and enrichment programs for homeless and at-risk school age children.

Programs

The Ohio School Facilities Commission administers a variety of programs that benefit public school districts, career-technical schools, and community schools. The Commission currently has seven major programs.

• Classroom Facilities Assistance Program (CFAP)

Initiated at the inception of the Commission, CFAP is the oldest and largest OSFC program. As provided by Ohio law, the CFAP program began working with the state's lowest wealth districts to provide funding for the entire facilities need within a district.

The program has enjoyed bipartisan support in the General Assembly. It has also been popular with local school districts, as state participation in funding is giving school districts a once in a lifetime opportunity to upgrade all their school facilities.

Included in this program is the Accelerated Urban Initiative, which has provided Ohio's six largest urban districts with the opportunity to open 117 new and renovated school buildings since 2002.

The Commission has provided funding for voter approved replacement and renovation projects in 224 school districts in Ohio, committing more than \$9.2 billion in state funding.

• Exceptional Needs Program (ENP)

The Exceptional Needs program (ENP) is a building replacement program for school districts whose buildings pose a health and safety risk to their students. The Commission has the authority to use up to twenty-five percent of its annual appropriations for the program.

To qualify for the ENP, the building involved must need replacement as opposed to expansion or renovation. Qualifying districts must rank below the 75th percentile on the School Facility Eligibility List, be over 300 square miles in size, or face issues of severe overcrowding. Districts less than three years from participation in the Classroom Facilities Assistance Program are not eligible unless the appropriate facility solution will serve the entire school district population.

An ENP subprogram, called the Extreme Environmental Contamination (ECC) program, assists

districts with buildings whose occupants are exposed to contaminants that pose a health and safety risk to students and staff.

A district's priority for participation in the program is based on a two-fold selection process that takes place annually. School districts are required to submit applications for each building to be considered. These applications must contain written and photographic documentation portraying the exceptional need. Applications are scored and ranked according to degree of severity in five major categories: health, life safety, structure, heating and ventilation, and electrical.

The Commission has an extensive review process, including assistance from an independent group of experts who scores each application and makes recommendations about which districts should receive funding. The Executive Director recommends program funding each year based upon the evaluation committee recommendations, funding availability, and other OSFC programs to be funded in the fiscal year.

School districts served by ENP remain eligible for funding assistance under the Classroom Facilities Assistance Program and may also participate in the Expedited Local

Programs

Partnership Program to complete the balance of their facility needs. Districts that have executed a construction contract for work under an approved Expedited Agreement are not eligible for the ENP.

• **Expedited Local Partnership Program (ELPP)**

Developed as a pilot program in 1999, the Expedited Local Partnership program (ELPP) allows school districts to fund a portion of their Master Facilities Plan through local monies prior to becoming eligible for state assistance through the Classroom Facilities Assistance program (CFAP) or Exceptional Needs program (ENP). Once a district enters CFAP, they receive credit against their required local contribution for the work completed under the ELPP. A school district must be over two years away from likely participation in CFAP to be eligible.

School districts interested in participating in the program must submit an application to the Commission. A facilities assessment and an enrollment projection are conducted, then the district and the Commission use this information to develop a Master Facilities Plan. The district then chooses a distinct part of the plan to pursue. Any project approved must be compliant with the Ohio School Design Manual. ELPP projects are funded entirely by the district and the construction of the project is administered by the district.

When a participating school district becomes eligible for state assistance, the Commission will reassess the classroom facilities needs of the district, counting the qualifying local expenditure amounts already spent as part of the local share. If the school district has spent more than the required local share on approved expenditures, the Commission may reimburse the district for the amount spent above the required local share.

• **Energy Conservation Financing Program (HB 264)**

This program, commonly referred to as “House Bill 264” in honor of the legislation that created it in 1984, allows school districts to issue unsecured bonds to make energy-saving facilities improvements. The cost of the improvements may not exceed the savings in energy, operating, and maintenance costs over a 15-year period. This program does not involve state funds. Commission approval simply allows districts to borrow funds for which they could otherwise need voter approval.

• **Facilities Assessment Program**

This program offers school districts the opportunity to request that OSFC assess the facility needs of the district prior to their eligibility for state assistance. Upon a district’s application, OSFC will provide an on-site evaluation, enrollment projections, and an initial master plan with an estimate of project cost. The information does not constitute any agreement to proceed with a project.

Programs

• Vocational Facilities Assistance Program (VFAP)

This program provides assistance to Joint Vocational School Districts (JVSD) for the improvement of classroom facilities suitable to their vocational education programs. State law requires that the Commission begin with the lowest ranked JVSD and provide funding for the entire district's needs. VFAP projects are co-funded by the local JVSD and the state. The Commission may use up to two percent of its yearly appropriations for these projects. State law prohibits the Commission from providing assistance for any space that will be used exclusively for an adult education program, the operation of a driver training school, or for any other space not used for educational programs of the JVSD.

• Vocational Facilities Assistance Expedited Local Partnership Program (VFAP-ELPP)

This program gives Joint Vocational School Districts the opportunity to move forward with facility improvements prior to their participation in the Vocational Facilities Assistance Program and receive state credit for qualifying expenditures. Districts wishing to participate in the VFAP-ELPP must submit an application and pass a Resolution to Participate. OSFC then performs an assessment of the district's facilities and enters into an agreement with the district on a Master Facilities Plan that covers the entire needs of the district. The district then chooses a "discrete portion" of their Master Facilities Plan

to fund through local efforts. When the district's turn later arises in the VFAP ELPP, the money spent by the district on the discrete portion is credited against the local share of the entire Master Facilities Plan.

Distribution of Schools

Since its inception, OSFC has worked with more than seventy-five percent of the state's public school districts, either in school construction/renovation or in the assessment of current conditions and the development of preliminary plans to address facility needs.

The results of this work have become increasingly apparent with the opening of more than 680 school buildings throughout the Ohio. The map below shows the counties where these schools have been built or renovated and the number of buildings opened in those counties.

As of
June 30, 2009

FY 2009 Project Completion

Twenty-two districts opened their final new or renovate buildings during FY 2009. This brings the number of district that have completed all necessary facility work to 148. The following provides details on the projects done in those 22 districts. For the purposes of this section, CFAP = Classroom Facilities Assistance program, ENP = Exceptional Needs program, and VFAP = Vocational Facilities Assistance program.

Ada Exempted Village Schools (Hardin County)

CFAP – Funded in 2005

Project Budget - \$20,772,357 State share: 73%

Construction Manager: Richard L. Bowen

Architect: SHP Leading Design

OSFC Planner: Lisa Laney

OSFC Project Administrator: Samantha Cothorn

Scope: Build one new facility to house grades K through 12.

This K-12 facility was built using a “Main St.” type of design with the new, modern science rooms, media centers, and other support areas branching off of one main hallway. This building also features a unique black box auditorium where full scenes can be drawn up and dropped down for performing arts purposes.

Dawson-Bryant Local Schools (Lawrence County)

CFAP – Funded in 2001

Project Budget - \$19,585,708 State share: 98%

Construction Manager: BBL/DAG/KPPE

Architect: Tanner Stone Architects

OSFC Planner: Melanie Drerup

OSFC Project Administrator: Stacey Thomas

Scope: Renovate the elementary school to house grades K through 5 and renovate the middle/high school to house grades 6 through 12.

Work on the Dawson-Bryant Elementary School (pictured) occurred over a 2.5-year time frame in a multi-phase project. The building was occupied the entire time, with minimal disruption to student learning and activities.

East Cleveland City Schools (Cuyahoga County)

CFAP – Funded in 1997

Project Budget - \$98,689,705 State share: 90%

Construction Manager: RP Carbone

Architect: Whitley-Whitley/URS Greiner

OSFC Planner: Melanie Drerup

OSFC Project Administrator: Fred Alhborn

Scope: Renovate three and build two new elementary schools to house grades K through 6. Build a new middle school to house grades 7 through 8 and build a new high school to house grades 9 through 12.

In one of the earliest projects funded through the Classroom Facilities Assistance Program, the district was able to use its partnership with OSFC to rebuild and renovate their district while consolidating buildings and improving operational efficiency. Children of all grade levels now have newer, nicer, and safer facilities in which they can get their education.

Project Status

Fredericktown Local Schools (Knox County)

Multiple programs – Funded in 2005

Project Budget - \$26,872,184 State share: 71%

Construction Manager: Turner Construction

Architect: MKC Associates Inc.

OSFC Planner: Bill Prenosil

OSFC Project Administrator: Tony Lococo

Scope: Build one new facility to house grades K through 12.

The school district consolidated three buildings into one facility housing all children in Kindergarten through 12th grade. The project was a two-stage operation, with part of the building built under the ELPP program and the other under the CFAP program. This facility includes the use of a geothermal well system as a part of its environmentally-friendly design.

Galion City Schools (Crawford County)

Multiple programs – Funded in 2004

Project Budget - \$50,226,476 State share: 76%

Construction Manager: Gilbane Building

Architect: Fanning/Howey

OSFC Planner: Wayne Colman

OSFC Project Administrator: Fred Ahlborn

Scope: Build a new elementary school to house grades K through 2, build a new elementary school to house grades 3 through 5, build a new middle school to house grades 6 through 8, and build a new high school to house grades 9 through 12.

The district's multi-million building program created a unified learning community by locating all four buildings on a single site. Student walkways connect the buildings, which also share athletic facilities, practice fields, parking, and an outdoor learning lab located in a nearby wetland.

Project Status

Gorham-Fayette Local Schools (Fulton County)

ENP – Funded in 2005

Project Budget - \$16,826,036 State share: 81%

Construction Manager: Barton Malow/Rupp

Architect: Buehrer Group

OSFC Planner: Melanie Drerup

OSFC Project Administrator: Keith VanDuesen

Scope: Build one new facility to house grades K through 12.

Groundwater contamination at its former site lead the Gorham-Fayette Local School District to apply for funding through the Extreme Environmental Contamination program. The district and OSFC partnered to create one single facility to house all grade levels from the separate facilities that previously existed. This new building offers upgraded technology and more modern learning spaces to enhance the education of its students.

Hicksville Exempted Village Schools (Defiance County)

CFAP – Funded in 2005

Project Budget - \$25,469,143 State share: 73%

Construction Manager: Touchstone CPM

Architect: Fanning/Howey

OSFC Planner: Wayne Colman

OSFC Project Administrator: Madison Dowlen

Scope: Build one new facility to house grades K through 12.

Collaborative planning helped create a triangular floor plan that takes up only one acre of the 40 acre site. Separate two-story academic wings for elementary and middle/high school students form two legs of the triangle, while the remaining leg contains academic specialty areas and athletic facilities. The unique floor plan minimizes student travel time and creates an interior courtyard for extended learning opportunities.

Indian Valley Local Schools (Tuscarawas County)

CFAP – Funded in 2004

Project Budget — \$40,393,730 State share: 79%

Construction Manager: Regency/Ruhlin

Architect: McDonald, Cassell & Bassett

OSFC Planner: Bill Prenosil

OSFC Project Administrator: Tamara Robitaille

Scope: Build one new and renovate and expand one elementary to house grades K through 5, renovate and expand the middle school to house grades 6 through 8, and renovate and expand the high school to house grades 9 through 12.

The extensive additions and renovations to Indian Valley Middle School have created a virtually new facility. The Indian Valley community wanted to keep their historic gymnasium. The brick and split-faced block structure sits in the heart of the Village of Tuscarawas, and is a cornerstone for that community and the entire district.

Project Status

Licking Valley Local Schools (Licking County)

CFAP – Funded in 2004

Project Budget - \$26,737,603 State share: 78%

Construction Manager: Regency/Ruhlin

Architect: Watchel & McAnally

OSFC Planner: Bill Prenosil

OSFC Project Administrator: Tamara Robitaille

Scope: Build one new elementary school to house grades K through 5, renovate and expand middle school to house grades 6 through 8, and renovate and expand the high school to house grades 9 through 12.

These facilities are the only OSFC facilities that have been completed without the district having to reach out to the public for a vote to manage their share of the costs; instead they used money that they had collected in their permanent improvement fund. These facilities are also unique because they display monumental brick carvings provided by a local brick manufacturer.

Lincolnview Local Schools (Van Wert County)

CFAP – Funded in 2005

Project Budget - \$17,375,781 State share: 71%

Construction Manager: Richard L. Bowen

Architect: Garmann/Miller

OSFC Planner: Wayne Colman

OSFC Project Administrator: Samantha Cothorn

Scope: Renovate and expand current elementary school to house grades K through 12.

The new building replaced two aging structures that previously housed the district junior/senior high school students. The oldest building was a 1919 structure that housed 17 of the 24 classrooms for the junior/senior high. The other building, a 1996 vintage, housed the remaining classrooms, gymnasium, and library. The new facility opened to the students on September 8th, 2008.

New Knoxville Local Schools (Auglaize County)

CFAP – Funded in 2005

Project Budget - \$7,917,310 State share: 71%

Construction Manager: Richard L. Bowen

Architect: Garmann/Miller

OSFC Planner: Wayne Colman

OSFC Project Administrator: Samantha Cothorn

Scope: Renovate and expand current elementary school to house grades K through 12.

The addition consisted of two new elementary classrooms and an infill area. The infill area provides additional space for a conference room, athletic director's office, gymnasium storage, and a new activities entrance. Renovations to the building include administrative offices, a front entrance, kitchen, and cafeteria.

Pickaway-Ross Joint Vocational School

VFAP – Funded in 2004

Project Budget - \$17,582,118 State share: 75%

Construction Manager: Resource International

Architect: Burgess & Niple

OSFC Planner: Eugene Chipiga

OSFC Project Administrator: Stacey Thomas

Scope: Renovate and expand facilities to accommodate the career-tech student population.

This career technical facility provides for 6 low bay programs and 9 high bay programs for students wishing to pursue careers in areas of business, cosmetology, culinary arts, health assistance, early childhood education, criminal justice, automotive, agriculture/horticulture and multiple construction disciplines, etc.

Pike County Joint Vocational School

VFAP – Funded in 2004

Project Budget - \$15,818,750 State share: 75%

Construction Manager: Resource International

Architect: Burgess & Niple

OSFC Planner: Eugene Chipiga

OSFC Project Administrator: Stacey Thomas

Scope: Renovate and expand facilities to accommodate the career-tech student population.

Renovation of the existing 107,361 sq.ft., and an addition of 27,710 sq.ft. This career technical facility provides for 7 low bay programs and 7 high bay programs for the County's HS students wishing to pursue careers in areas of: business administration, medical/health assistance, culinary arts, hospitality, criminal justice, automotive, and multiple construction disciplines, etc.

Seneca East Local Schools (Seneca County)

CFAP – Funded in 2004

Project Budget - \$27,429,770 State share: 68%

Construction Manager: Gilbane Building

Architect: Fanning/Howey

OSFC Planner: Wayne Colman

OSFC Project Administrator: Fred Ahlborn

Scope: Build one new facility to house grades K through 12.

A community-based committee developed the special features of the building, which include an entrance for daily school activities and a secondary "after school" entrance which provides access to the auditoria and two gymnasiums. The potential for future expansion for additional classrooms and an auditorium has been included in the design.

Springfield City Schools (Clark County)

CFAP – Funded in 2000

Project Budget - \$195,429,492 State share: 80%

Construction Manager: Ruscilli/Kapp

Architect: Lesko & Associates

OSFC Planner: Melanie Drerup

OSFC Project Administrator: Fred Ahlborn

Scope: Build 10 new elementary schools to house grades K through 5, four new middle schools to house grades 6 through 8, a new high school to house grades 9 through 12, and an alternative school serving grades K through 12.

The new Springfield High School is the 16th and final building of a Master Plan that consolidated and replaced 23 existing aging facilities. Designed for 2,447 students, the building uses the "Schools within a School" concept. The curved classroom wing is divided into four small schools that will house 600 students, each with their own Administration and Guidance offices and Extended Learning Area.

Project Status

Steubenville City Schools (Jefferson County)

Multiple programs – Funded in 2004
Project Budget - \$39,388,714 State share: 77%
Construction Manager: Heery International
Architect: Architectural Vision Group
OSFC Planner: Bill Prenosil
OSFC Project Administrator: Samantha Cothorn

Scope: Build one new middle school to house grades 6 through 8. Buena Vista, Garfield, Lincoln, McKinley, Roosevelt and Wells elementary schools and Steubenville High School are part of this Exceptional Needs Program plan.

The school formerly known as Garfield Elementary was built in 1961. The OSFC project provided a 15,000 sq. ft. addition to the original 29,875 sq. ft. concrete block and brick building. This renovation and addition to the K-5 elementary school allowed the student population to increase to 350.

Stryker Local Schools (Williams County)

ENP – Funded in 2005
Project Budget - \$11,009,794 State share: 54%
Construction Manager: Touchstone CPM
Architect: Beilharz Architects
OSFC Planner: Wayne Colman
OSFC Project Administrator: Madison Dowlen

Scope: Renovations/additions to the 1980 elementary school portion of Stryker High School in order to create a K through 12 facility.

Although this was a relatively small project, it was done in three phases. A locally funded initiative saved some of the space for an auditorium/gym. This facility was equipped with upgraded technology and a new lobby space outside of the gym that can be used as a gathering area or a place to sell items during athletic events.

Tri-Valley Local Schools (Muskingum County)

Multiple programs – Funded in 2005
Project Budget - \$68,760,780 State share: 72%
Construction Manager: Turner/Resource
Architect: McDonald, Cassell & Bassett
OSFC Planner: Bill Prenosil
OSFC Project Administrator: Tony Lococo

Scope: Build four new elementary schools to house grades PK through 6, renovations/additions to Tri-Valley High School to house grades 9 through 12. One new middle school to house grades 7 through 8 and an addition to the high school was completed under the Expedited Local Partnership Program.

The new elementary houses approximately 360 students and 32 staff. The interior features a cheerful color scheme appropriate for elementary students. It contains 18 classrooms, a gymnasium available for use by the public, and the latest technology. The cafeteria is the hub, located centrally with deep, coffered ceilings and a raised stage.

Project Status

Trotwood-Madison City Schools (Montgomery County)

Multiple programs – Funded in 2004

Project Budget - \$76,238,502 State share: 66%

Construction Manager: Megan Construction

Architect: Fanning/Howey

OSFC Planner: Glenn Rowell

OSFC Project Administrator: Madison Dowlen

Scope: Build one new elementary school to house grades PK through 1, two new elementary schools to house grades 2 through 5 and one new middle school to house grades 6 through 8.

Through a partnership with the Ohio School Facilities Commission, Trotwood-Madison City Schools rebuilt its entire school district. A new high school was funded under the OSFC's Expedited Local Partnership Program, and four new buildings were funded as part of the Classroom Facilities Assistance Program. Under the CFAP program the district built a new K-1 school, two grade 2-5 elementary schools, and a new grade 6-8 middle school.

Vinton County Local Schools

CFAP – Funded in 2004

Project Budget - \$44,561,502 State share: 90%

Construction Manager: Quandel/Dynamix/ProjDel

Architect: Fanning/Howey

OSFC Planner: Bill Prenosil

OSFC Project Administrator: Chad Miller

Scope: Build three new elementary schools to house grades PK through 5 and one new middle school to house grades 6 through 8; renovations/additions to Vinton County High School to house grades 9 through 12.

Over the course of seven years, two OSFC-funded initiatives replaced every school in McArthur, Ohio. Most recently, the district received three new elementary schools and a new middle school. Designs for all four buildings focused on providing appropriately-scaled learning environments and shared-use facilities that can serve the community as well as faculty and students.

Project Status

Waynesfield-Goshen Local Schools (Auglaize County)

Multiple programs – Funded in 2005

Project Budget - \$16,581,043 State share: 91%

Construction Manager: Richard L. Bowen/EdArch

Architect: Garmann/Miller Architects

OSFC Planner: Wayne Colman

OSFC Project Administrator: Samantha Cothorn

Scope: Renovate and add to the 1997 section of the Waynesfield-Goshen facility to house grades PK through 12.

The Waynesfield-Goshen School District began their school year on September 2nd, after completion of an approximately 33,725 sq. ft. renovation to the high school building to create a PK-12 facility. The new addition includes not only classrooms for high school, middle school, and elementary school, but also a state-of-the-art media center, new music suites, modern science and art rooms, a new vocational lab, locker rooms, and a new middle school gymnasium.

Wheelersburg Local Schools (Scioto County)

Multiple programs – Funded in 2004

Project Budget - \$38,043,839 State share: 74%

Construction Manager: Bovis Lend Lease, Inc.

Architect: Tanner Stone Architects

OSFC Planner: Bill Prenosil

OSFC Project Administrator: Jennifer Fetty

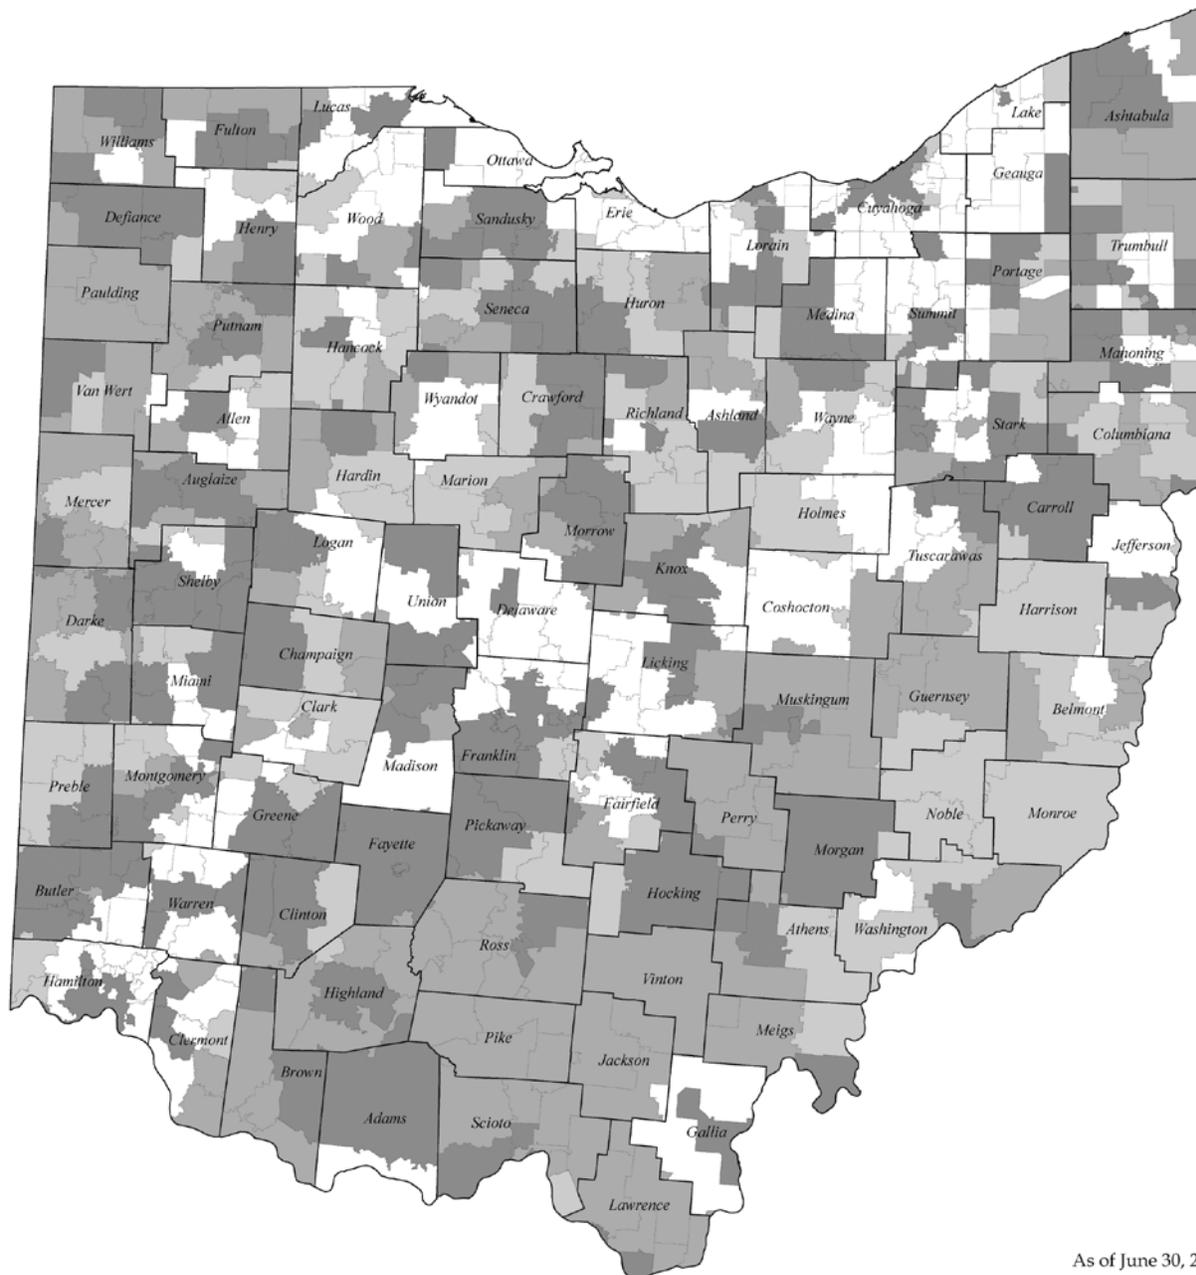

Scope: Build one new facility to house PK through 12.

The New K-12 facility is designed for 1,500 students under one roof. The plan divides the student body into 4 age-appropriate groups that spend most of the school day in their designated areas. The exterior of the building has separate "front door" entrances for K-8 students and 9-12 students.

Project Status

Current District Status

Since its inception in 1997, the Ohio School Facilities Commission has worked with the majority of districts in Ohio in either actual construction or in the planning and design of a school facilities project. This map looks at those districts and shows their current relationship with the Commission.

-  All necessary construction and renovation work in the district has been completed. (*Vocational districts in this category include Southern Hills JVS, Pike County JVS, and Pickaway-Ross JVS.*)
-  The facilities plan for the district has been funded and work is ongoing. (*Vocational districts in this category include Butler Technology, Gallia-Jackson-Vinton JVS, Knox County JVS, and Scioto County JVS*)
-  District has been offered state funding, but has either chosen to postpone participation or been unable to raise their required local share. (*Vocational districts in this category include Belmont-Harris, Columbiana County, Lawrence County, Tri-Rivers, U.S. Grant, Upper Valley, and Vanguard-Sentinel JVS's.*)
-  District is participating in the Expedited Local Partnership program in anticipation of state funding. (*Warren County JVSD is included in this category.*)

Funding Offered in FY 2009

Through the continued use of Tobacco Securitization funding, the Commission was able to fund a 55 new projects during Fiscal Year 2009, the highest yearly total since the Commission was established. The projects were funded through the Classroom Facilities Assistance (CFAP), Exceptional Needs (ENP) and Vocational Facilities Assistance (VFAP) programs. The following are the districts funded and their prospective budgets.

District	County	Program	Local Share	State Share	Total Project Cost
7/24/2008					
Carey EVSD	Wyandot	CFAP	\$11,986,147	\$15,888,614	\$27,874,761

Project Status

The Ohio School Facilities Commission administers several programs that provide state assistance to school districts and community schools in the acquisition, construction, and renovation of classroom facilities. Each of these programs is centered on the development of a Master Facility Plan that addresses the entire facility needs of a school district. A school district's priority for state assistance from the OSFC is based on the district's three-year average "adjusted valuation per pupil," as calculated by the Department of Education.

Program participation is voluntary, with eligible districts given an annual opportunity to accept an offer of funding from the Commission. Those districts who

do not accept the offer of funding are said to have "deferred" participation. Districts who accept an offer of funding from OSFC have, by statute, one year to raise their legally required local share of the project cost. If a district does not meet their requirement, any funds encumbered for their project are returned to OSFC's general appropriations to be used on other projects. Districts who do not acquire their local share within that period are said to have "lapsed" their funding. Lapsed districts can participate in OSFC programs in the future, but only after they raise their required local share.

The following is a list of those districts who have deferred participation or whose funding lapsed.

Deferred

School District	County	School District	County

Project Status

By June 30, 2009, through the Classroom Facilities Assistance Program (CFAP), Exceptional Needs Program (ENP), and Vocational Classroom Facilities Assistance Program (VFAP), the Ohio School Facilities Commission had opened 629 new or renovated buildings in 213 school districts. Another 148 buildings were in design and 180 were under construction. In 148 school districts, all facility needs have been fully addressed. The following report summarizes the work completed or

ongoing across the state in the CFAP, ENP, and VFAP programs. Those districts with their name in bold type are those with all necessary work completed. Please note that in some instances, ENP projects address the entire facility need of a district through consolidation into one building. Therefore, a completed ENP project may or may not represent the completion of all work in a district.

District	County	Program	Year Funded	Status	Total Project Budget	State Share (%)	Buildings In Design	Buildings Under Construction	Buildings Complete
