Below are the questions that have been received to date for the RFQ of the above-referenced project:

1. Are geotechnical services considered (and will they be included) for an additional services fee?
   A. Yes, this is additional service

2. The development of a POR is specifically indicated as an additional service, so it looks like it is not included in that base services fee percentage, is that correct?
   A. This is correct. The selected Criteria Architect is required to provide these services as an additional fee.

3. The RFQ says that this solicitation is for criteria architect services, but section B mentions construction phase services, can you clarify this?
   A. During the construction period, provide not less than six (6) hours (excluding travel time) on-site construction administration services each week, including (1) attendance at progress meetings, (2) a written field report of each site visit, (3) meeting minutes, (4) on-site representation comprised of the A/E and its consultant staff involved in the primary design of the project, all having relevant and appropriate types of construction administration experience

4. It looks like this will be delivered as a design-build project, but then it mentions that you will be assigning architect as primary, is this correct? We want to be correct in assuming that the response for this should be coming from an architect, not a builder.
   A. Pursuant to ORC 153.694, professional design firms selected to provide C-A/E services shall not provide any A/E of Record services for the project for which the professional design firm was selected as the C-A/E.

5. Will the criteria A/E be able to continue with the work, or will that have to be done by a completely different architectural firm as a part of a Design/Build team (and will all of the firms providing services that are contracted as Criteria not be able to propose on the actual Design/Build project)?
   A. The selected Criteria Architect cannot propose with any Design/Build Team on this project.
