Project Overview

A. Project Description

The Ohio History Connection fulfills several major responsibilities for the State of Ohio including the maintenance and operation of the state archives, the state museum, and the state historic site system; administration of the state historic preservation office; and providing educational outreach and services to the local history community. Ohio History Connection holds in trust the state archives and historical artifacts in perpetuity for all Ohioans. The Ohio History Connection is undertaking to expand their Collections Storage Facilities. The facility is to provide suitable storage for artifacts that comprise the state museum.

The primary conservation objectives are 1) sufficient space to store, care for, and access items, 2) physical security, and 3) environmental stability (constant temperature and relative humidity).

The curatorial objectives are 1) accessibility, and 2) engagement.

The user experience internally is supported by the integration of this space into the overall scheme of the Center with respect to adjacencies and connectivity, and externally supports the original design intent while minimizing issues of approach, access, and views.

The site is located at the Ohio History Center campus, 800 E 17th Avenue, Columbus, Ohio. The selected AE will prepare the Program of Requirements (POR) as an Additional Service in conjunction with the Program Verification phase of the Basic Services. The POR will be in response to the Feasibility Study findings and as directed by curatorial objectives and user objectives. The Feasibility Study is in development.

B. Scope of Services

The Scope of Services is anticipated to conform to typical project development for design and construction while meeting schedule milestones.

Upon award of the Agreement, commence by developing the Program of Requirements.

The selected A/E, as a portion of its required Scope of Services and prior to submitting its proposals, will discuss and clarify with the Owner and/or the Contracting Authority, the cost breakdown of the Architect/Engineer Agreement detailed cost components to address the Owner's project requirements. Participate in the Encouraging Growth, Diversity & Equity (EDGE) Program as required by statute and the Agreement.

As required by the Agreement, and as properly authorized, provide the following categories of services: Program Verification, Schematic Design, Design Development, Construction Document Preparation, Bid and Award Support, Conformed Documents, Construction Administration, Post-Construction, and Additional Services of all types.

Refer to the *Ohio Facilities Construction Manual* for additional information about the type and extent of services required for each. A copy of the standard Agreement can be obtained at the OFCC website at <http://ofcc.ohio.gov>.
