Date posted: 11/19/2018

Date revised: 11/20/2018

Below are the questions that have been received to date for the RFQ of the above-referenced project:

1. If a CM/GC is utilized as a consultant to the design team will they be prohibited from bidding the project?
  - A. As a consultant to the design professional, the firm would be precluded from bidding.
2. Do you have an idea of the civil engineering required for this project (i.e. access drive, etc.)?
  - A. The civil engineering required for this project will be dependent on the scale, location, and final design to be built.
3. The RFQ references educational outreach and engagement. How much will the public have access and be engaging with this expansion?
  - A. The philosophy of public access and engagement for the Center's collection storage facilities expansion will be incorporated into the programming of the project. The concepts being entertained include but are not limited to Visible Storage Collage, Visible – Self Directed, Exhibit/Display, Visible Storage – Semi Accessible, Visible Storage – View, Visible Storage – Technology Accessed, and others.
4. Is Geotech required during the implementation phase if it is being provided during the feasibility study?
  - A. Yes. Geotechnical Analysis will be required as it specifically applies to the needs of the design and construction phases of the project. The feasibility study is providing general data as to building construction type with geotechnical restraints of potential sites, hence the minimal geotechnical requirement for this study.
